Contents of Volume 144, No. 1

PAGE

Biosynthesis and Degradation

Effects on protein synthesis of injecting synthetic polyribonucleotides into living cells.
By H. R. Woodland & S. E. Ayers 11

Putrescine catabolism in mammalian brain.
By N. Seiler & M. J. Al-Therib 29

Rat cerebral-cortex adenosine deaminase activity and its subcellular distribution.
By I. Pull & H. McIlwain 37

The metabolic sequence by which some 4,4-dimethyl sterols are converted into cholesterol.
By G. F. Gibbons 59

The influence of substrate concentrations on the rate of insect juvenile hormone biosynthesis by corpora allata of the desert locust *in vitro*.
By S. S. Tobe & G. E. Pratt 107

Activities of prolyl hydroxylase, lysyl hydroxylase, collagen galactosyltransferase and collagen glucosyltransferase in the liver of rats with hepatic injury.
By J. Risteli & K. I. Kivirikko 115

Collagen biosynthesis. Characterization of subcellular fractions from embryonic chick fibroblasts and the intracellular localization of protocollagen prolyl and protocollagen lysyl hydroxylases.
By R. Harwood, M. E. Grant & D. S. Jackson 123

Yeast protein synthesis. Preparation and analysis of a highly active cell-free system.
By C. H. Sissons 131

Lipolysis and hydrogenation of galactolipids and the accumulation of phytanic acid in the rumen (*Short Communication*).
By R. M. C. Dawson, N. Hemington, D. Grime, D. Lander & P. Kemp 169

Bioenergetics

The nature and properties of the inducible sodium-plus-potassium ion-dependent adenosine triphosphatase in the gills of eels (*Anguilla anguilla*) adapted to fresh water and sea water.
By J. R. Sargent & A. J. Thomson 69

PAGE

Energy-linked reduction of nicotinamide-adenine dinucleotide in membranes derived from normal and various respiratory-deficient mutant strains of *Escherichia coli* K12.
By R. K. Poole & B. A. Haddock 77

Proton/sodium ion antiport in *Escherichia coli*.
By I. C. West & P. Mitchell 87

Subcellular Structures

The reconstitution of microsomal redox chains. A comparative analysis of the effectiveness of membrane self-assembly and template binding of electron carriers.
By A. I. Archakov, G. I. Bachmanova, V. M. Devichensky, I. I. Karuzina, N. S. Zherebkova, G. A. Alimov, G. P. Kuznetsova & A. V. Karyakin 1

Caution in the interpretation of plant ribosome studies (*Short Communication*).
By C. J. Leaver & J. A. Dyer 165

Cellular Interactions and Control Processes

Regulatory effects of polyamines on membrane-bound acetylcholinesterase.
By A. Kossorotow, H. U. Wolf & N. Seiler 21

Phenethylbiguanide and the inhibition of hepatic gluconeogenesis in the guinea pig.
By K. Ogata, M. Jomain-Baum & R. W. Hanson 49

Inhibition by the branched-chain 2-oxo acids of the 2-oxoglutarate dehydrogenase complex in developing rat and human brain.
By M. S. Patel 91

Oestradiol uptake and retention, and high-affinity binding sites in cultured rabbit uterus.
By S. L. Russell & G. H. Thomas 99

Enzyme synthesis in the regulation of hepatic 'malic' enzyme activity.
By G. Murphy & D. G. Walker 149

PAGE

Differences in the products of mitochondrial protein synthesis *in vivo* in human and mouse cells and their potential use as markers for the mitochondrial genome in human–mouse cell hybrids.
By A. Jeffreys & I. Craig 161

Development

Changes in respiratory activities during the cell-cycle of the fission yeast *Schizosaccharomyces pombe* 972h⁻ growing in the presence of glycerol.
By R. K. Poole & D. Lloyd 141

PAGE

Metabolism in Whole Organisms

Glucose transport in *Entamoeba histolytica*.
By R. Serrano & R. E. Reeves 43

Distribution and metabolism of phenylalanine and tyrosine during tularaemia in the rat (*Short Communication*).
By M. C. Powanda, R. E. Dinterman, R. W. Wannemacher, Jr. & G. D. Herbrandson 173

Contents of Volume 144, No. 2

PAGE

Biosynthesis and Degradation

Degradation of monogalactosyl diglyceride and diagalactosyl diglyceride by sheep pancreatic enzymes.
By S. S. Bajwa & P. S. Sastry 177

Urate synthesis in the perfused chick liver.
By E. Barratt, P. J. Buttery & K. N. Boorman 189

Synthesis of phosphoenolpyruvate carboxykinase (guanosine triphosphate) by isolated liver polyribosomes.
By F. J. Ballard, M. F. Hopgood, L. Reshef, S. Tilghman & R. W. Hanson 199

Alternative pathways of zeaxanthin biosynthesis in a *Flavobacterium* species. Experiments with nicotine as inhibitor.
By J. C. B. McDermott, D. J. Brown, G. Britton & T. W. Goodwin 231

Studies on the metabolism of 5α-androst-16-en-3-one in boar testis *in vivo*.
By Y. A. Saat, D. B. Gower, F. A. Harrison & R. B. Heap 347

The relative stability of liver cytosol enzymes incubated *in vitro*.
By M. F. Hopgood & F. J. Ballard 371

Inhibitory effect of carbon monoxide on the *N*- and ring-hydroxylation of 2-acetamidofluorene by hamster hepatic microsomal preparations (*Short Communication*).
By P. D. Lotlikar & K. Zaleski 427

Possible site of flavonoid synthesis in the photosynthetic apparatus (*Short Communication*).
By K. Saito 431

PAGE

Subcellular Structures

Transport of catecholamines by resealed chromaffin-granule 'ghosts'.
By J. H. Phillips 311

Steady-state kinetics of catecholamine transport by chromaffin-granule 'ghosts'.
By J. H. Phillips 319

Cellular Interactions and Control Processes

Androgen responsiveness of the liver of the developing rat.
By J.-Å. Gustafsson 225

Inhibition of progesterone of the lactogenic effect of prolactin in the pseudopregnant rabbit.
By L. Assairi, C. Delouis, P. Gaye, L.-M. Houdebine, M. Ollivier-Bousquet & R. Denamur 245

Adenosine 3′:5′-cyclic monophosphate in young and senescent human fibroblasts during growth and stationary phase *in vitro*. Effects of prostaglandin E_1 and of adrenaline.
By R. J. Haslam & S. Goldstein 253

Biogenesis of mitochondria. Phospholipid synthesis *in vitro* by yeast mitochondrial and microsomal fractions.
By G. S. Cobon, P. D. Crowfoot & A. W. Linnane 265

A study of various changes in transfer ribonucleic acid methylase activity during adenovirus-12 transformation *in vitro*.
By E. S. McFarlane 277

PAGE

Soluble neutral and acid maltases in the suckling-rat intestine. The effect of cortisol and development.
By G. Galand & G. G. Forstner 281

Isolation of microvillus plasma membranes from suckling-rat intestine. The influence of premature induction of digestive enzymes by injection of cortisol acetate.
By G. Galand & G. G. Forstner 293

The response of the small intestine to vitamin D. Correlation between calcium-binding-protein production and increased calcium absorption.
By J. S. Emtage, D. E. M. Lawson & E. Kodicek 339

Simulation of biogenic amine metabolism in the brain.
By A. J. Turner, J. A. Illingworth & K. F. Tipton 353

Hormonal control of liver regeneration.
By S. Thrower & M. G. Ord 361

A study of 3′:5′-cyclic mononucleotide-dependent protein kinase from canine prostate glands.
By B. K. Tsang & R. L. Singhal 377

Effects of antimycin and 2-deoxyglucose on adenine nucleotides in human platelets. Role of metabolic adenosine triphosphate in primary aggregation, secondary aggregation and shape change of platelets.
By H. Holmsen, C. A. Setkowsky & H. J. Day 385

PAGE

The effect of adrenocorticotrophin on protein degradation in rat adrenal gland and liver.
By J. A. Canick & D. B. Villee 397

Specific changes in the messenger ribonucleic acid content of the rat ventral prostate gland after androgenic stimulation. Evidence from the synthesis of aldolase messenger ribonucleic acid.
By W. I. P. Mainwaring, F. R. Mangan, R. A. Irving & D. A. Jones 413

Development

Albumin and transferrin synthesis during development in the rat.
By G. C. T. Yeoh & E. H. Morgan 215

Protein synthesis and breakdown in the mother-cell and forespore compartments during spore morphogenesis in *Bacillus megaterium*.
By M. W. Eaton & D. J. Ellar 327

Metabolism in Whole Organisms

Intracellular protein breakdown in thermophilic and mesophilic fungi.
By H. M. Miller, P. A. Sullivan & M. G. Shepherd 209

Water-soluble metabolites of *p*-nitrophenol and 1-naphthyl *N*-methylcarbamate in flies and grass grubs. Formation of glucose phosphate and phosphate conjugates.
By M. P. Heenan & J. N. Smith 303

Pullulanase synthesis in *Klebsiella* (*Aerobacter*) *aerogenes* strains growing in continuous culture.
By G. C. Hope & A. C. R. Dean 403

Contents of Volume 144, No. 3

PAGE

Biosynthesis and Degradation

The effect of storage on enzyme activities in tissues.
By A. Cryer & W. Bartley 433

Metabolism of [^{14}C]citrulline in the perfused sheep and goat udder.
By E. Roets, R. Verbeke, A.-M. Massart-Leën & G. Peeters 435

Effect of cobalt on the synthesis and degradation of hepatic catalase *in vivo*.
By Y. Yasukochi, M. Nakamura & S. Minakami 455

PAGE

The carbon assimilation pathways of *Methylococcus capsulatus*, *Pseudomonas methanica* and *Methylosinus trichosporium* (OB3B) during growth on methane.
By T. Strøm, T. Ferenci & J. R. Quayle 465

Purification and properties of 3-hexulose phosphate synthase and phospho-3-hexuloisomerase from *Methylococcus capsulatus*.
By T. Ferenci, T. Strøm & J. R. Quayle 477

Cyclic metabolic pathway of a butylated hydroxytoluene by rat liver microsomal fractions.
By C. Chen & Y.-S. Shaw 497

PAGE

The biosynthesis of granulose by *Clostridium pasteurianum*.
By R. L. Robson, R. M. Robson & J. G. Morris 503

Mobilization of granulose in *Clostridium pasteurianum*. Purification and properties of granulose phosphorylase.
By R. L. Robson & J. G. Morris 513

The development of plastocyanin in greening bean leaves.
By B. G. Haslett & R. Cammack 567

Biosynthesis of *trans,trans*- and *cis,trans*-farnesols by soluble enzymes from tissue cultures of *Andrographis paniculata*.
By K. H. Overton & F. M. Roberts 585

Concentrations of histamine in brain of guinea pig and rat during dietary protein malnutration (*Short Communication*).
By C. O. Enwonwu & B. S. Worthington 601

Bioenergetics

The role of mitochondria in modifying the cellular ionic environment. Calcium-induced respiratory activities in mitochondria isolated from various tumour cells.
By R. F. W. Thorne & F. L. Bygrave 551

Inhibition of mitochondrial phosphate transport by *p*-diazobenzenesulphonate (*Short Communication*).
By A. P. Dawson 597

Subcellular Structures

Fractionation of the proteins of plant microbodies.
By R. H. Brown, J. M. Lord & M. J. Merrett 559

Cellular Interactions and Control Processes

Ribonucleic acid labelling and nucleotide pools during compensatory renal hypertrophy.
By J. M. Hill, G. AB & R. A. Malt 447

PAGE

Inducibility and some properties of the threonine dehydratase of sheep liver.
By S. Doonan, D. H. Koerner, W. Schmutzler & C. A. Vernon 533

Studies on the role of calcium ions in the stimulation by adrenaline of amylase release from rat parotid.
By R. L. Dormer & S. J. H. Ashcroft 543

Intranuclear localization and receptor proteins for 1,25-dihydroxycholecalciferol in chick intestine.
By D. E. M. Lawson & P. W. Wilson 573

Virally mediated membrane changes: inverse effects on transport and diffusion (*Short Communication*).
By C. A. Pasternak & K. J. Micklem 593

Early changes in the messenger ribonucleic acid concentration of amino acid-starved cells of *Escherichia coli* are not dependent on the state of the *rel* gene (*Short Communication*).
By J. E. M. Midgley & R. J. Smith 603

Development

Regulation of hepatic L-serine dehydratase and L-serine–pyruvate aminotransferase in the developing neonatal rat.
By K. Snell & D. G. Walker 519

Induction of cystathionase in human foetal liver (*Short Communication*).
By K. Heinonen & N. C. R. Räihä 607

General Methods

Short-term radiorespirometry of cell suspensions.
By W. G. Duncombe 487
